3. RATIONALE AND BENEFITS

PIL holds 54% stake in PEBS since October 2009. One of PIL's most successful initiatives since its inception, PEBS was set up in 2008 with a vision to emerge as a leader in the pre-engineered buildings and structural steel industry space.

PIL acquired 51% stake in PEL in 30 November 2012 with the objective of entering new areas of engineering services. PEL has strong references in a range of technologies including desalination, effluent treatment and recycling, demineralization and instrumentation.

Accordingly, the merger of the Transferor Companies with the Transferee Company would have the following benefits:

- Enable the shareholders of PIL to get direct participation in the promising business of PEBS & PEL.
- Further, the merger would offer a greater potential to the combined entity to develop and further grow and diversify with better optimization of funds and efficient utilization of resources.
