INFRASTRUCTURE

We have an experience working with 18+ industries across key players of AEC industry right from contractors-architects to fabricators-consultants, MEP contractors and PEMB (Pre Engineered Metal Building) companies. We offer a variety of engineering services and solutions covering a wide portion of the design cycle such as concept designs, design and detailed engineering, analysis, installation and fabrication drawings, as-built designs and technical publications.

-  Commercial and High Rise buildings
-  Production facilities
-  Data Centres
-  Health and Educational constructions
-  Power and energy
-  Transportation hubs
-  Industrial and Distribution
-  Stadium and Leisure centres

PROCESS BASED

We have been delivering our expertise across the industry players of EPC industry right from OEM's-Solution Providers to Fabricators-Engineering consultants, System integrator companies. We offer a variety of engineering services and solutions covering a wide portion of the design cycle such as design and detailed engineering, analysis or calculations, installation and fabrication drawings, bill of materials, as-built designs and technical manuals.

-  Oil & Gas
-  Water Treatment
-  Power and energy
-  Food & Beverages
-  Pharmaceuticals
-  Metals and Mining

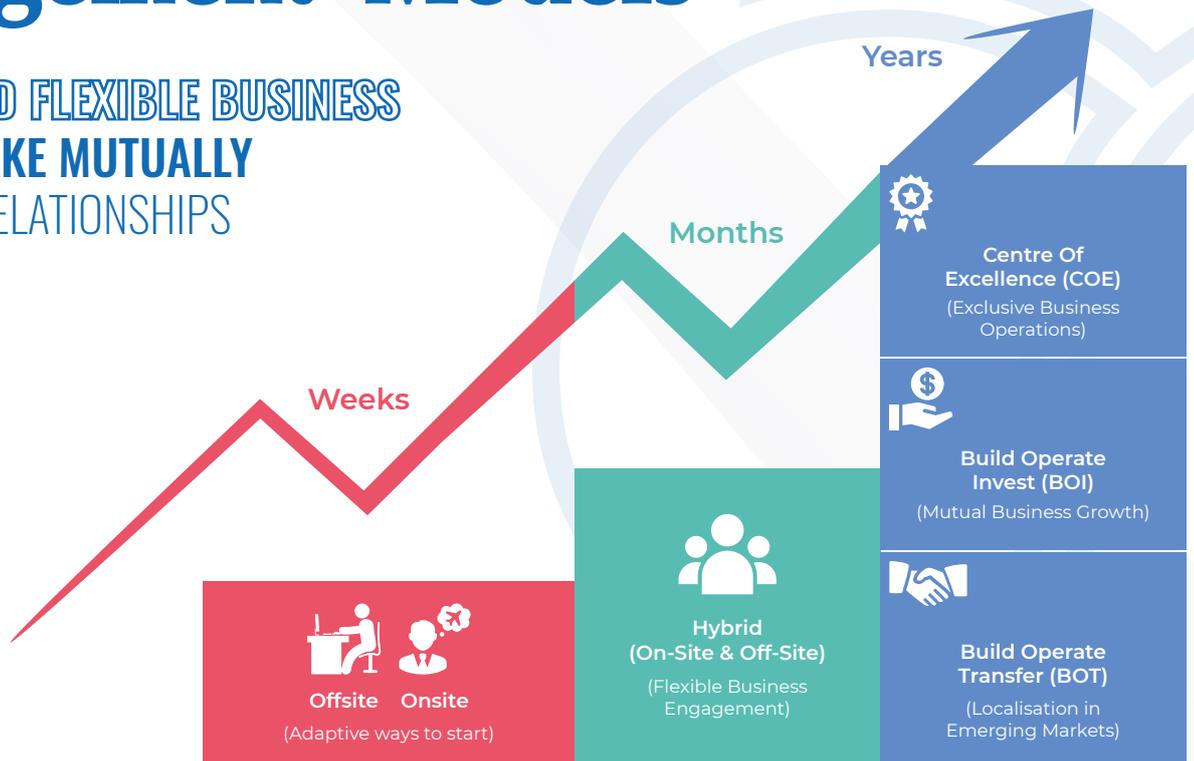

DISCRETE

We have been working with multiple industry players of Automotive, Heavy-Off highway vehicles and Warehouse Industry especially with Tier 1, Tier2, Machine builders, OEM's, Solution providers and System integrator companies. We offer a variety of services and solutions covering a wide portion of the design cycle such as concept design, prototype designs, detailed designs, analysis or simulations, installation and fabrication drawings, bill of materials, as-built designs and technical publications.

-  Automotive
-  Heavy Engineering
-  Warehouses
-  Trucks
-  Off Road Vehicles

Solutions

Digital Consultancy Solutions

Our approach to a digital solution is constructive and a framework based where we form an integrated team of Subject matter experts (SME's), technological experts, data scientists and program managers. With this framework of approach, we offer various industrial solutions where we are a part of the 4th Industrial revolution and we make customer delightful.

Application Development

Predictive Maintenance
